## **DETAILED ACTION**

### ***Allowable Subject Matter***

Claims 1, 4, 6 – 10, 13 and 15 – 19 are allowed.

The following is a statement of reasons for the indication of allowable subject matter:

Applicant has submitted a terminal disclaimer overcoming non-statutory double patenting rejections of claims 1, 4, 7, 8, 9, 13, 15, 16 and 19. Applicant has amended claim 1 overcoming the claim objection which has now been withdrawn by the Examiner.

Zimmerman shows a method of dividing power from a waveguide input where tuning comprising an impedance post/s (30) and power adjusting probe (18) but does not show the power adjusting probe (26) located in the waveguide between the impedance post (30) and one of the outputs (18), where the probe/s are attached to the end section of the waveguide (22) and are not between the impedance post and the output/s (claims 1 and 13); or where the second power selective probe operating perpendicular to the longitudinal axes across the lateral cross section, each second pair of inductive members extending across the lateral cross section located on either side of the second capacitive probe (claim 19), nor would have been obvious by the prior art to change the location of the tuning probe, thus the claims are in condition for allowance.
